

Please reject NAB's petition 04-160. I have been an XM Radio subscriber since the beginning of this year, and I think it's the greatest thing since sliced bread. The ability to offer local traffic and weather is a great boon, since there is currently no Chicago broadcast radio station that offers this on as consistent and regularly occurring basis as XM. I live in the Chicago area, and traffic nightmares are not uncommon--I very much appreciate the ability to tune into XM's Chicago traffic/weather channel and hear an update instantly.
